CAREER OBJECTIVE

MANAGEMENT INFORMATION SYSTEMS

➤ My long-term goals are to improve myself with rapidly developing technology, I want to adapt to the environmental conditions and the era, and to have better knowledge every time.
➤ With the increasing use of technology and Internet, the security concern has given birth to the concept of Cyber security and the interest in this sector has increased and widespread in our country day by day. For this reason continuity in the Management information system is increasing and as long as the developing technology improves itself, the reasons in the management have increased.

Freelancer.com ms sqlserver Creating tables on the database, looking at the security structure on the table and linux, working in coordination for 3 years. Supporting the project-based remote working method carried out with the DBA admin.

MIAROSA

The general works done in Miarosa Hotel are taking Qnap backups, network installation of missing devices, arranging the damaged system room and carrying out the cabinet operations. It is ensuring the order of the ethernet cable of the end users.

VAKIFBANK

Project-based work was carried out with the follow-up of the records of incoming breakdown calls via the Vakıfbank application over the phone and the download of Office 365 over the departments, performing the active director join process, arranging the mail on.

NAUTICAL HOTEL

Arrangement of devices made over nautical hotel data processing, installation of active director fortigate VMware and switch AP VPN, integration of regionally made devices to end users, arrangement of system room and regular daily follow-up of backup operations were carried out.

ODIA CLINICS

In coordination with the Odia Clinics IT and social media team

In general, the control of the system network in all operational processes is the responsibility of the system room.

I took an active role in situations such as maintenance of other devices, follow-up of other devices, system intervention in case of malfunction

As it is known, it is our most important goal that the system is continuous.

We minimized system loss by intervening in errors as soon as possible, thus ensuring continuity.

We have secured the system infrastructure by closing it and prioritizing the privacy of our patients.

KIND REGARDS.
